327. **P. WATER INTRUSION AND MOLD GROWTH:** Studies have shown that various forms of water intrusion affect
328. many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
329. leaving the home.

330. Examples of exterior moisture sources may be:

- 331. • improper flashing around windows and doors,
- 332. • improper grading,
- 333. • flooding,
- 334. • roof leaks.

335. Examples of interior moisture sources may be:

- 336. • plumbing leaks,
- 337. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 338. • overflow from tubs, sinks, or toilets,
- 339. • firewood stored indoors,
- 340. • humidifier use,
- 341. • inadequate venting of kitchen and bath humidity,
- 342. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 343. • line-drying laundry indoors,
- 344. • houseplants—watering them can generate large amounts of moisture.

345. In addition to the possible structural damage water intrusion may do to the Property, water intrusion may also result
346. in the growth of mold, mildew, and other fungi. Mold growth may also cause structural damage to the Property.
347. Therefore, it is very important to detect and remediate water intrusion problems.

348. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
349. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious
350. health problems, particularly in some immunocompromised individuals and people who have asthma or allergies
351. to mold.

352. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
353. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
354. Property inspected for moisture problems before entering into a purchase agreement or as a condition of your
355. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
356. Property.

357. **Q. NOTICE REGARDING PREDATORY OFFENDER INFORMATION:** Information regarding the predatory
358. offender registry and persons registered with the predatory offender registry under MN Statue 243.166
359. may be obtained by contacting the local law enforcement offices in the community where the property
360. is located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of

5. Minnesota Statute 1031.235 requires that, before signing an agreement to sell or transfer real property, Seller must disclose information in writing to Buyer about the status and location of all known wells on the property. This requirement is satisfied by delivering to Buyer either a statement by Seller that Seller does not know of any wells on the property, or a disclosure statement indicating the legal description and county, and a map showing the location of each well. In the disclosure statement Seller must indicate, for each well, whether the well is in use, not in use or sealed.

10. Unless Buyer and Seller agree to the contrary in writing, before the closing of the sale, a Seller who fails to disclose the existence or known status of a well at the time of sale, and knew or had reason to know of the existence or known status of the well, is liable to Buyer for costs relating to sealing of the well and reasonable attorneys' fees for collection of costs from Seller, if the action is commenced within six years after the date Buyer closed the purchase of the real property where the well is located.

15. Legal requirements exist relating to various aspects of location and status of wells. Buyer is advised to contact the local unit(s) of government, state agency, or qualified professional which regulates wells for further information about these issues.
